Project Problem Statement for Project-IV

Project Group ID: CSPIT/CSE/A2			
Student ID:	**23CS065**	**23CS068**	
Name:	**HENIL PATEL**	**MEET PATEL**	
Project Title:	**MUNICIPAL COMPLAINT MANAGEMENT SYSTEM**		
Domain of Project Definition:	**E-Governance (Web + AI)**		

Technology/Methodologies to be used in project:	• **Frontend**: HTML, CSS, JavaScript (React / Bootstrap)
	• **Backend:** Python (Flask / Django) or Node.js
	• **Database**: MySQL / PostgreSQL / MongoDB
	• **AI Components:**
	  • Natural Language Processing (NLP)
	  • Text Classification using Machine Learning / Deep Learning
	• **AI Models:**
	  • TF-IDF + Machine Learning (Logistic Regression / SVM)
	  • OR Transformer-based models (BERT) for complaint categorization
	• **APIs:** RESTful APIs
	• **Authentication:** JWT / Role-based login
	• **Deployment:** Cloud (AWS / Render / Railway)
	• **Methodology:** Agile Development		

Project Objectives	• To provide a centralized digital platform for registering and tracking municipal complaints. • To automatically categorize complaints using AI based on complaint text. • To reduce manual workload and response time for municipal authorities. • To improve transparency and accountability in complaint handling. • To enable citizens to track complaint status in real time. • To generate data-driven insights for better city governance.
Brief Description about project:	The Municipal Complaint Management System is a web-based application integrated with AI that enables citizens to register municipal complaints online. The system uses Natural Language Processing (NLP) to automatically categorize complaints and assign them to the appropriate municipal department. It helps authorities track, manage, and resolve issues efficiently while providing transparency and real-time status updates to citizens.
SWOT analysis chart for the Project	Project Deliverables	• Web Application (Citizen & Admin Panels) • AI-based Complaint Classification Model • Database and Backend APIs • Testing and Evaluation Report • Final Project Documentation and Presentation

Assessment Rubric to evaluate Difficulty level of Project:

Criteria	Marks
Scope and Complexity	04
Technical Challenges	04
Resource Requirements	03
Quality level of Gantt Chart	03
Quality level of SWOT analysis chart	03
Innovation and Creativity	03
Total (Out of 30)	20

Assessment Rubric to evaluate quality of Project Problem Statement:

Criteria	Marks
Clarity of Problem Statement	03
Relevance to Project Objectives	04
Clarity of Language and Presentation	04
Overall Impression	03
Total (Out of 20)	14

Mentor's Comments: AI must used to define the priority of the task.
